

Beyond the bench – Turning discoveries into treatments

DZG Training Programme Translational Research

Translational
Research

training
programme
2024/25

All scientists in medical research have an ultimate goal in mind: To prevent, treat or cure specific diseases. However, stepping out of the lab and moving towards the patient is a complex multi-step process and a challenge. This programme directs at young scientists from all DZG with a strong interest in translational research. It provides application-oriented insights from experts and offers approaches to develop an individual and concrete project plan. Participants get connected with important partners and with peers from all eight DZG. Participation in this kick-off seminar is open for all interested early career scientists.

Beyond the bench – Turning discoveries into treatments

Translational research – What is it all about?

Kick-off seminar, Zoom

October 9, 2024, 12:30 – 15:30

Please **register here**.

Chair: Elisabeth Zeisberg | Göttingen

Programme

- 12:30 Uncovering medical needs – The clinical view [Yigal Pinto](#) | Amsterdam, NL
- 12:50 Translational research: What is it all about? [Marie Allen Schroeder](#) | Hellerup, DK
- 13:10 Phases of translation [Andreas Zeiher](#) | Frankfurt
- 13:30 Break
- 13:35 Small molecules and PROTACS [Florian Bassermann](#) | Munich
- 13:50 Cell culture and animal models [Monika Nowak-Imialek & Eckhard Wolf](#) | Munich
- 14:20 Immunology [Carolin Daniel](#) | Munich
- 14:35 Break
- 14:40 Technologies and device development [Georg Lutter](#) | Kiel
- 14:55 Digital solutions, platforms and big data [Fabian Theis](#) | Munich
- 15:10 Cell and gene therapy [Tobias Feuchtinger](#) | Freiburg

Programme language is English.
